

PRODUCT INFORMATION

Colostrum Powder, Colostrum Oral Gel and Colostrum Bolus Forte For Goats

PROFILE

Colostrum Powder and Colostrum Bolus are nutritional products for newborn goats, which contain a source of live (viable) naturally occurring microorganisms, dried colostrum milk and vitamins.

ABOUT THE PRODUCTS

The colostrum provided in Colostrum Powder and Colostrum Bolus Forte supplies a source of maternal antibodies and protein. Lactobacillus organisms contained in these products assist in the establishment of beneficial microflora in the newborn. L. acid excreted by these organisms will influence pH reduction in the small intestine. This action removes the environment needed by certain coliform bacteria to proliferate and perhaps cause disease.

The newborn receives a generous supply of highly absorbable, essential vitamins and trace minerals, which are necessary for the establishment of good health.

INGREDIENTS:

Colostrum Bolus - Dried Colostrum, Lactobacillus, Vitamins A, D, E and B12 and Minerals

Colostrum Oral Gel – Dried Colostrum, Lactobacillus, Vitamins A, D3, E and B12

Colostrum Powder – Dried Colostrum, Lactobacillus, Vitamins A, D, E and B12

HOW SUPPLIED:

Colostrum Bolus – 25 per jar - 12 per case

Colostrum Oral Gel – 30ml Dial a Dose Tube - 12 per case

Colostrum Powder – 9 oz. Jar – 12 per case

DIRECTIONS FOR USE:

Colostrum Bolus - One bolus after birth – One bolus twice daily as needed.

Colostrum Oral Gel – Administer 10ml to newborn goats, sheep or calves, as soon as possible after birth. Administer 10ml on the second day and 10ml on the third day.

Colostrum Powder – One teaspoonful in milk or milk replacer. Continue administration of product as long as goats are on milk replacer or milk.
