

Product Information

E.C.F. Pak

Contents:

Each 46.5 gm packet of soluble electrolyte provides the following values per 5 liters (5000 ml):

Sodium Chloride.....	32.2 gms
Sodium Acetate.....	12.3 gms
Potassium Chloride.....	1.9 gms

Net Weight:

46.5 gm (Makes 5 Liters)

Also available in 185.4 gm (Makes 2 ½ gallons)

Indications:

This formula is often referred to as the “Iowa State” formula for use in the rehydration of calves at a very economical cost per liter of solution. In comparison to the popular, but unavailable, Sanofi product “Multisol – R3x” that was packaged in 100ml vials for dilution to 3 liters (3000 ml).
