

Product Information

Equi-Bac Oral Gel for Horses and Foals

Profile:

Equi-Bac is a high potency oral gel for horses and foals containing a source of live viable naturally occurring microorganisms, yeast, enzymes and vitamins. Equi-Bac is especially designed to be used on newborns, as the mare goes through a heat cycle at three to five days post birth, causing a change in the ph of the mares milk. This can cause a diarrhea condition in the foal. Equi-Bac is recommended for use in foals at this time.

Each Dose Contains:

- Bacteria – 10 billion CFU's per dose
- Enzymes – Yeast
- Vitamin A 100,000 units per dose
- Vitamin D 3 – 20,000 units per dose
- Vitamin E – 200 units per dose
- Vitamin B12 – 150 mcg per dose

Advantages:

- Highest level of lactobacillus
- Economical Size – 80ml tube
- True Gel base that melts at body temperature

How Supplied:

80ml tube – 72 tubes per case
