

Product Information

Hyalun®

Pure Hyaluronic Acid Dietary Supplement 100% Natural - Oral Administration

Hyaluronic acid is the important component of synovial fluid and is responsible for the lubrication and shock absorption in the joints and tissues.

High Quality

The hyaluronic acid in Hyalun® is one of the purest and highest in molecular weight of any oral hyaluronic acid product on the market today. Higher molecular weight acid can hold more water, has better lubrication properties and better shock absorbing properties than low molecular weight hyaluronic acid.

Easy to Feed

Hyalun® is a tasteless liquid supplement that your horse won't spit out or sort from his feed, unlike competitive joint supplements! Simply add one full dropper (1ml) of Hyalun® to your horse's feed each day. Hyalun® is available in a 30 and 90-day supply of this revolutionary new supplement.

The Benefits of Hyaluronic Acid (HA)

- Hyaluronic Acid is a major component of Synovial Joint Fluid
- HA provides lubrication and shock absorption in joints
- HA supports normal joint and cartilage function
- Lubricates the soft tissues of the joint
- HA provides maximum joint flexibility for optimum performance

Hyalun® Gel – Pre and Post Event Booster

Jump-start your Hyalun® daily regimen with NEW Hyalun® Gel! Hyalun® Gel is a 30ml-3-dose syringe designed specifically as a pre/post event booster and also as a preload to the daily oral supplement. Hyalun® Gel is six times more powerful than the daily Hyalun®.

HyaFlex™

HyaFlex® is a tasteless liquid supplement that your pet won't spit out or sort from his feed, unlike competitive joint supplements! Simply add the specified amount to your pet's food or favorite treat once daily.

The patented oral hyaluronic acid for normal joint function.
